## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 2 is objected to because of the following informalities: the limitation "first-entry and second entry valid identification comprises a PIN" should read, "first-entry and second entry of a valid identification comprise a PIN". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1 and 2, as best understood, is rejected under 35 U.S.C. 102(b) as being anticipated by Eisenberg, US Patent number 5,354,974.

With regard to claim 1, Eisenberg discloses an ATM machine (column 2 lines 59-61) comprising a computer to receive a identification (column 2 lines 63-68), determine if the identification is from a user who is under duress (column 3 lines 4-9), and activate an alarm if it is an alert identification (column 3 lines 9-13). If the ATM receives a first ID, it can still determine if a second ID is needed (column 3 lines 41-44).

With regard to claim 2, Eisenberg discloses the identification is a PIN number (column 2 lines 63-68).
